PROFILE SUMMARY

Experienced software developer with 3 years of expertise in cross-platform mobile app development using Flutter. Skilled in building robust, scalable apps with clean architecture and responsive UI. Proficient in Agile methodology, RESTful APIs, and third-party integrations.

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart, Python, HTML, CSS
State Management : Provider, Getx, BLOC, Cubit
Tools & Platforms: Android Studio, VS Code,Xcode, Postman, Git, Github, Jira, Figma, Firebase
Concepts: Clean Architecture, MVC Architecture, ,DDD SOLID Principles, Agile Methodologies

EXPERIENCE

Senior Software Developer – Flutter   Jan 2023 – Present
OONZOO Portal L.L.C   Dubai, UAE

- Led the design and development of scalable Flutter applications across mobile and web platforms.
- Specialized in Flutter architecture, UI/UX implementation, and cross-platform optimization.
- Solved complex technical challenges through effective problem-solving and debugging.
- Collaborated closely with cross-functional teams to ensure project success and timely delivery.
- Maintained high standards for code quality, scalability, and maintainability.
- Mentored junior developers and contributed to team growth and knowledge -sharing.

PROJECT

Tradiify – LMS for Trading Education | Flutter, Dart, Provider, Laravel, Hive, Firebase

- Built an LMS platform for trading education with video, text, and live interactive classes.
- Enabled course browsing, mentor following, live session booking, and skill assessments via quizzes.
- Developed mentor tools for course uploads, student meetings, and assignment management.
- Integrated secure login with Firebase Auth and push notifications via Firebase Messaging

Spartan – Real-Time Messaging Platform - | Flutter, Dart, Provider, Node js, Socket.io, Hive, Firebase

- Built a messaging app with one-to-one and group chat, typing indicators, and read receipts.
- Supported media sharing (images, videos, voice, documents) and custom emojis.
- Enabled 24-hour status updates and user profiles with bio and photo.
- Provided offline access to chat history and locally cached media using Hive.
- Integrated real-time push notifications with Firebase Messaging and secure authentication.

Ginni Social – Entertainment & Social Networking App | Flutter, Dart, Provider, Nodejs, Socket.io, Firebase

- Developed a social media app with feed, reels, and story sharing (24hr) features.

- Enabled one-to-one chat with media sharing and direct reel sharing via chat.

- Implemented user profiles, follow/unfollow, and block/unblock functionality.

- Integrated referral system with rewards tracking and redemption.

- Added AdMob monetization (banner/interstitial ads) and content view tracking.

- Used Firebase Auth & Messaging for secure login and real-time push notifications.

- Managed app state with Provider; backend via REST APIs and Socket.io

Oonzoo – Hyper-local Shopping App | Flutter, Dart, Provider, Node js, OneSignal

- Developed a hyper-local e-commerce app for browsing and purchasing from nearby vendors.

- Enabled smart location-based product discovery, vendor listings, and category-wise navigation.

- Implemented cart, checkout, order tracking, and past order history features.

- Integrated Stripe payments, cash on delivery, and secure refund/return flow.

- Built user profiles with saved addresses, wishlist, and purchase history.

- Supported mobile & web access with responsive UI and OneSignal push notifications.

SalesHub – Vendor Management Platform | Flutter, Dart, Provider, Node js, OneSignal

- Built a vendor-side app for managing product listings, inventory, and pricing in real-time.

- Enabled store configuration including location, category, and working hours.

- Implemented coupon management with scheduling and usage limits.

- Managed order processing, returns, and real-time order tracking.

- Developed an analytics dashboard for monitoring sales, revenue, and product performance.

- Supported mobile and web access with responsive UI and OneSignal push notifications.

Music Player – Local Audio Playback App Flutter, Dart, MethodChannel, GetX

- Built a local music player app with audio fetched via platform-specific MethodChannel.

- Implemented playlist creation, favorites management, and audio controls (play, pause, drag, shuffle).

- Integrated status bar controls for seamless background playback handling.

- Managed state and UI reactivity using GetX for smooth user experience.

Education

Flutter Development   may 2022- Dec 2022
Brototype , Kochi

Bachelor of Computer Application.   2018 - 2021
Calicut University
